the question is how did a once great nation that built an empire lose it all from the meiji restoration in 1868 restoring imperial rule under emperor meiji until japan s surrender at the end of the second world war in 1945 the dream lasted a comparatively short period of time seventy seven years from beginning to end under emperor meiji s rule imperial japan began a period of rapid industrialization and militarization leading to its emergence as a world power and the establishment of a colonial empire economic and political turmoil in the early 1920s led japan down the path of militarism culminating in her conquest of large parts of the asian and pacific region the beginning of this path can be traced back to the paris peace conference in 1919 when japan s proposal for racial equality was supported and approved by the other members but overruled by the american president woodrow wilson was this rebuttal by the west and in particular the united states the moment that changed the course of history during the empire s existence japan was involved in some sixteen conflicts resulting in the occupation of numerous countries and islands throughout asia and the pacific regions thousands were under the emperor s control not all of whom were treated as they should

The Japanese experience of war from the late nineteenth to the mid twentieth century presents a stunning example of the meteoric rise and shattering fall of a great power as Japan modernized and became the one non-European great power. Its leaders concluded that an empire on the Asian mainland required the containment of Russia. Japan won the First Sino-Japanese War (1894-5) and the Russo-Japanese War (1904-5) but became overextended in the Second Sino-Japanese War (1931-45) which escalated with profound consequences into World War II. A combination of incomplete institution building, an increasingly lethal international environment, a skewed balance between civil and military authority, and a misunderstanding of geopolitics explains these divergent outcomes. This analytical survey examines themes including the development of Japanese institutions, diversity of opinion within the government, domestic politics, Japanese foreign policy, and China's anti-Japanese responses. It is an essential guide for those interested in history, politics, and international relations.

The book demonstrates that even if during the first period of the Shwa era (1931-1945) the real driving force to war was the Japanese military, Hirohito as Supreme Commander gave full support to the army on multiple occasions. As an emperor, he sanctioned many government policies. Accordingly, he was responsible for the war and for the atrocities that the Japanese troops committed in Asia during the Pacific War. *Japan's Empire Disaster* is a book of information and training, a reference document that should be read as an educational tool on the history of the modernization of Japan and the war launched by Emperor Meiji and Hirohito to build Japan's empire in the Pacific and East Asia. The book shares the view of the author on Hirohito's responsibility on the events that marked Japan's entry into the war that began when Japanese troops invaded Manchuria on September 19, 1931, and culminated with Japan's surprise attack on the U.S. naval base at Pearl Harbor on December 7, 1941.

The army that carved out Japan's land empire during World War 2 is examined in depth in two volumes drawn from period and modern Japanese and American sources. The Imperial Army's corps are arranged as they were deployed in the field, each with its history and order of battle. A chapter covering the divisions and brigades deployed under them follows. Next, an index of individual units arranged by code number is provided to make searching the book easy. Over 6,000 units are identified and represented in the two volumes. Today, the Japanese army remains mysterious in part because it was secretive by nature. These books are wide

ranging and informative but of special interest is the ability to draw back the curtain on one of the imperial japanese army s most coveted secrets the intelligence code name and number camouflage it called tsushogo the imperial japanese army volume 2 conquest and occupation 1941 to 1945 visits the battlefields and japanese occupied territories throughout asia and the pacific chapter 2 reveals the army s history and organization in the southeast and central pacific beginning with imperial general headquarters and continuing through the southern expeditionary army to the china expeditionary army and china s then border with manchuria this is an illuminating reference based on original sources no student of the history of world war 2 in asia and the pacific will want to be without

a thought provoking analysis of the bombing of hiroshima and nagasaki and what might have happened if conventional weapons were used instead it has always been a difficult concept to stomach that the atomic bombs dropped on hiroshima and nagasaki in 1945 causing such horrific suffering and destruction also brought about peace attitudes toward the event have changed through the years from grateful relief that world war ii was ended to widespread condemnation of the united states atomic salvation investigates the full situation examining documents from both japanese and allied sources but also using in depth analysis to extend beyond the mere recounting of statistics it charts the full extent of the possible casualties on both sides had a conventional assault akin to d day gone ahead against japan the work is not concerned solely with the military necessity to use the bombs it also investigates why that necessity has been increasingly challenged over the successive decades controversially the book demonstrates that japan would have suffered far greater casualties likely around 28 million if the nation had been attacked in the manner by which germany was defeated by amphibious assault artillery and air attacks preceding infantry insertion and finally by subduing the last of the defenders of the enemy capital it also investigates the enormous political pressure placed on america as a result of their military situation the truman administration had little choice but to use the new weapon given the more than a million deaths that allied forces would undoubtedly have suffered through conventional assault by charting reaction to the bombings over time atomic salvation shows that there has been relentless pressure on the world to condemn what at the time was seen as the best and only military solution to end the conflict never has such an exhaustive analysis been made of the necessity behind bringing world war ii to a halt
